## EXPERIENCE

### Frontend Development Intern — VELOOP Rewards

Aug 2026 – Present

- Architected a reusable, animated React.js component library, replacing one-off interfaces with a scalable structure for future feature development.
- Redesigned promotional interfaces with a mobile-first responsive layout using Vite and CSS Modules, improving usability across device sizes.

### Frontend Developer Intern — Zetheta Algorithms Private Limited

Apr 2026 – Jul 2026

- Engineered a real-time stock screener in React.js and TypeScript, using strict typing to model financial data structures and catch integration errors before runtime.
- Optimized frontend rendering to sustain responsive filtering and charting under continuous live data updates.

### Machine Learning Intern — Unified Mentor Pvt. Ltd.

Oct 2025 – Jan 2026

- Engineered NLP-based classification models with Scikit-learn, tuning feature representations to reach 87% validation accuracy.
- Deployed the trained model as a Flask REST API, cutting manual QA review effort by approximately 60%.

### Python Development Intern — Techno Hacks Solutions Pvt. Ltd.

Aug 2025 – Sep 2025

- Built modular Flask backend services for data-processing workflows, maintaining high test coverage to ensure reliability under sprint deadlines.
- Integrated third-party REST APIs, delivering documented, maintainable backend modules for downstream consumption.
